

WEEF & GEDC partnering with AEEA Conference

Cape Town – South Africa | 28 November–1 December 2022
Adapting to Global Disruption

Keynote Spotlight

Mr Xavier Fouger | Dassault Systemes

LEARNING ECOSYSTEMS AT THE EDGE OF THE METAVERSE.

As the planet faces the historic imperative of a green transition, engineers more than ever will use virtual representations to imagine and –above all to create smarter solutions in all human activities. Enabling this evolution requires digital skills to connect virtual universes with reality. The presentation explores fundamental competencies and practical means that emerge in different places of the world to develop them in engineering students. Among such means are global ecosystems in which African countries can invent new roles for their youth and their economies.
